

## SEEDS After School Field Day

Kaleva Norman Dixon Elementary School kindergartner Aeris Hardenburgh uses a sponge to fill a bucket with water as teams compete in a water relay race used to demonstrate energy transfer during the SEEDS After School Field Day at the Historic Barns Park in Traverse City. Over 130 students from six area schools participated in the event, which is part of the program's six-week summer camp held at participating schools. Students took part in activities surrounding this year's theme, "Energize Me," such as making solar prints, creating solar-powered musical instruments, garden tastings and a clean energy art challenge.
